Changing Compass & Altimeter Settings on inReach SE+ / Explorer+

Administrator - 2017-03-10 - 0 Comments - in How-To

The Compass & Altimeter Settings menu allows you to calibrate the built-in sensors on your inReach device.

Your inReach Explorer+ device was calibrated at the factory, and the altimeter uses automatic calibration by default.

To calibrate your Compass & Altimeter:

1. Select **Settings** and press ✓
2. Select **Compass & Altimeter** and press ✓
3. Select an option from the list and press ✓

Calibrate Compass

Calibrates the compass behaviour to ensure accuracy.

Auto Calibrate Altimeter

Enabled by default, the Barometric Altimeter uses automatic calibration. This can be disabled to calibrate the Barometric Altimeter manually.

Calibrate Altimeter

Manually calibrate the Barometric Altimeter using methods such as Known Elevation, Known Pressure, and GPS Elevation.
