Customizing Data Fields on the Map, Compass & Trip Info Pages with inReach SE+ / Explorer+

Administrator - 2017-03-09 - [0 Comments](#) - in [How-To](#)

The data fields displayed on the Map, Compass and Trip Info pages can be customized to display the specific data fields based on your requirements.

This article explains how to customize the data fields displayed on the Map, Compass and Trip Info pages.

1. Select **Map**, **Compass** or **Trip Info** and press ✓
2. Press  and the **Menu** will be displayed.
3. Select **Change Data Fields** and press ✓
4. Use the  to select the data field you wish to modify and press ✓
5. Select the new data field you wish to display and press ✓

NOTE: the Sunset and Sunrise data fields will need a current basic forecast request to display data within that field.
