## Enable Daylight Savings Time for inReach SE and inReach Explorer

Administrator - 2017-07-05 - [0 Comments](#) - in [How-To](#)

An inReach SE or inReach Explorer device does not automatically enable or disable the Daylight Saving setting each spring and fall. If the current time displayed on the left-hand side of the status bar of your inReach device is off by one hour follow the instructions below to review the Daylight Saving setting for your device.

### Changing Daylight Savings Time

1. Power on the inReach device.
2. Select **Settings**.
3. Select **Time**.
4. Select **Daylight Saving**.
5. Select **ON**.
