Exporting GPS & KML Data from the Explore Portal

Administrator - 2018-08-01 - 0 Comments - in How-To

The Explore portal allow you to export your data in GPX or KML format. To export your data perform the following actions:

Solution: Export Data

1. Login to inreach.garmin.com

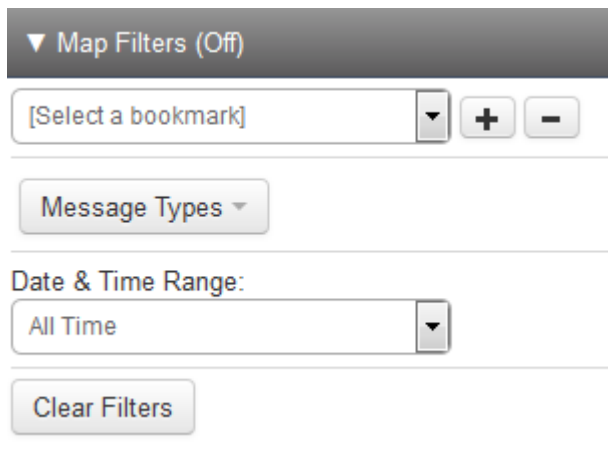

2. Click on the "Map" tab

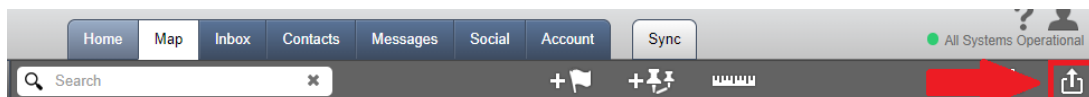

3. Expand "Map Filters"

4. Choose the desired date and time range (we recommend using "All Time")

5. Click on the "Export" button

6. Click on either "KML File" or "GPX" file

Export

Exported data is based on the current map filter settings and users that are selected as visible (not necessarily just those on the map at the current location). Adjust the filters to export a different set of data.

KML File

GPX File
