Hide Location from Social Media Posts on Explore Portal

Administrator - 2018-08-10 - 0 Comments - in How-To

IMPORTANT NOTE: Due to changes to Facebook's security protocol, Garmin is no longer able to post to user's walls. inReach device users will still be able to post to fan pages. Garmin is working with Facebook for a resolution.

You can hide your location data from social media posts (Facebook and Twitter) by following the steps below.

Solution: Remove location data from social media post

1. Login to inreach.garmin.com.

2. Click on the **Social** tab.

3. In both the Facebook and Twitter sections you will see the option: "Don't include my location in posts".

4. Sync your device afterwards to apply the changes.

For instructions on syncing your inReach SE, Explorer, Explorer+, and SE+ device, please see the links below:
