Navigating to a Message Location using inReach SE+ / Explorer+

Administrator - 2017-03-07 - 0 Comments - in How-To

When a message is sent, the message contains details related to the message content, recipient, date, location, speed, course, and elevation.

This article explains how to navigate to the location a message was sent from.

1. Select **Messages** and press ✓
2. Select a conversation from the list and press ✓
3. Select a message that includes  and press ✓
4. The message details will be displayed.
5. Select **Navigate** and press ✓ to navigate to the location from which the message was sent.

TIP: Use the **Map** and **Compass** to navigate to your destination.
