## Navigating to a Waypoint using inReach SE+ / Explorer+

Administrator - 2018-10-25 - 0 Comments - in How-To

Waypoints are locations you create and store on the device. Waypoints can mark where you are, where you are going, or where you have been. When a waypoint is created or edited it will also appear on your MapShare page. Waypoints can be created using your [inreach.garmin.com](https://inreach.garmin.com) account or directly on your device.

This article explains how to navigate to a waypoint.

1. Select **Waypoints** and press ✓
2. Choose a waypoint from the list and press ✓
3. Your waypoint location details will be displayed.
4. Select **Navigate** and press ✓

**TIP:** Navigate to your destination using the **Map** and **Compass**.
