Navigating with the Map using inReach SE+ / Explorer+

Administrator - 2017-03-08 - 0 Comments - in How-To

The map page shows your location, sent and received messages, waypoints, and a colored track line connecting your track points. The inReach Explorer+ map shows streets, points of interest, and topographical information.

You can customize the information displayed on the map by navigating to **Settings > Map**.

This article explains how to use the map.

NOTE: Your device uses direct routing, and it does not create routes on roads.

1. Select **Map** and press 

The  represents your location on the map.

Use the  to pan the map and view different areas.

Use  and  to zoom in and out.

Press  for additional map options.
