Reactivating Service Plan in the Explore portal

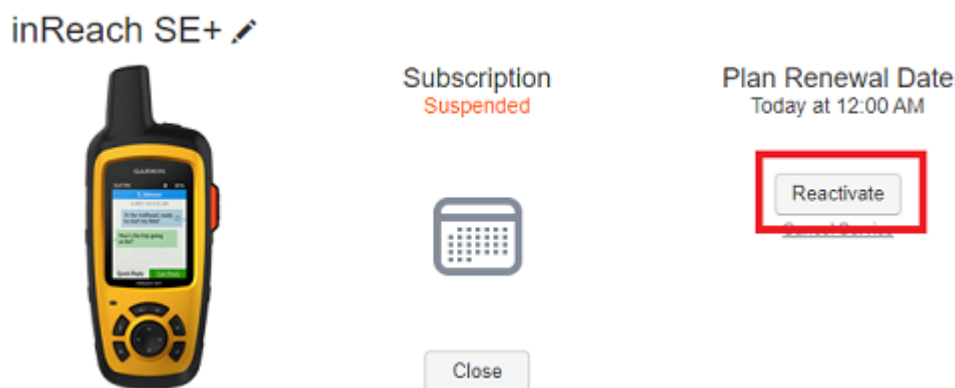

Administrator - 2019-07-29 - 0 Comments - in Service/Account Management

Please follow these steps to reactivate your inReach service:

1. Login to <https://inreach.garmin.com/>.
2. Click on the **Plans & Devices** tab. **Note:** If no devices appear under the **Plans & Devices** tab, your device was previously deactivated. Click the **Add inReach Device** button to add your device.
3. Click on the **Edit** button located under the "Subscription" heading.

4. Click on the **Reactivate** button.

5. Select a new plan then click the **Reactivate** button.
6. The system will take a few minutes to process the plan change.
7. It is recommended that you sync your inReach device before leaving. The steps for syncing can be [found here](#). **Note:** If you own an older inReach Original device (no screen), consult [this article](#) for updating your device.
