Remove Location Data from SMS Messages for inReach Enterprise

Administrator - 2017-07-05 - Comments (0) - How-To

You can remove your name, location information, and the link to the MapShare map from SMS messages. Please note: each user must login to their account and configure this setting. The administrator account cannot set this option for all users.

Solution: Customize SMS location data

1. Login to inreach.garmin.com.
2. Click the **Settings** tab followed by the **Billing** tab.
3. You will see your SMS options under the **SMS Message Configuration** header.

4. You will need to sync your device to apply the changes.

For instructions on syncing your inReach SE, Explorer, Explorer+, or SE+ device, please see the links below:
