Sending a Message to Social Media via the inReach Explorer and SE

Administrator - 2017-07-05 - 0 Comments - in How-To

To send a message to Facebook and Twitter you must first link your accounts with the explore.delorme.com portal. Instructions for doing so can be found here: <http://support.inreachcanada.com/kb/articles/75>. Once completed follow the instructions below:

Note: Replies from Facebook and Twitter will not appear on the device. Replies from MapShare will route back to your device.

1. From the main screen select **Social**.
2. Press the arrow key up to select **Facebook, Twitter, or MapShare**. Press the  to select the option.
3. Scroll back down **Message** and then press the checkmark key.
4. Compose your message using the on-screen keyboard and then select **OK** when done.
5. Select **Send** and then press the checkmark key.
6. The message will attempt to send.
