Sending a Message using inReach SE+ / Explorer+

Administrator - 2017-03-08 - 0 Comments - in Getting Started

The inReach SE+ / inReach Explorer+ can send text messages via the Iridium satellite network when used on its own or when paired to an Android or iOS device using the Earthmate app.

This article explains how to send a message from the inReach+ device.

1. Select **Messages** and press ✓
2. Select **New Message** and press ✓
3. Select an option:
 - Select **To:** to enter new recipients manually.
 - Select  to select recipients from your contacts list.
4. Select an option:
 - Select **Message:** to compose a new message manually.
 - Select  to select a quick text message.
5. When finished, select **Send Message** and press ✓
