Sending a Reference Point using inReach SE+ / Explorer+

Administrator - 2017-03-08 - 0 Comments - in How-To

The map page shows your location, sent and received messages, waypoints, and a colored track line connecting your track points. The inReach Explorer+ map shows streets, points of interest, and topographical information.

You can customize the information displayed on the map by navigating to **Settings > Map**.

This article explains how to send a reference point.

You can send a message that includes a reference point with details about another location. This feature is helpful if you want to meet someone at that location.

1. Select **Map** and press ✓
2. Using the  navigate to a location on the map and press ✓
3. Select **Send Reference Point** and press ✓
4. Select **Continue** and press ✓
5. Select an option:
 - Select **To:** to enter new recipients manually.
 - Select  to select recipients from your contacts list.
6. Select an option:
 - Select **Message:** to compose a new message manually.
 - Select  to select a quick text message.
7. When finished, select **Send Message** and press ✓
8. Your message will be delivered with the location of the reference point.
