Testing the inReach SE+ / Explorer+

Administrator - 2019-03-06 - [0 Comments](#) - in [How-To](#)

Before taking your inReach with you on a trip, you should test the device outdoors to ensure your satellite subscription is active and your device is working properly.

This article explains how to test your inReach.

1. Scroll to **Test** on the screen of your device and press ✓
2. Select **Test** and press ✓ to start the test.
3. Your inReach will send and receive a test message.
4. **Test Successful** will be displayed when finished.
5. Select **Done** and press ✓
6. Your inReach is now ready for use.
