Viewing Data Use using inReach SE+ / Explorer+

Administrator - 2017-03-09 - 0 Comments - in How-To

You can view your plan details, and the number of messages, preset messages, and track points sent during the current billing cycle. The data use counter resets automatically at the beginning of each billing cycle.

This article explains how to view your data use.

1. Select **Data Use** and press 
2. Your usage details will be displayed.
