Weather Forecast Details for the inReach SE and inReach Explorer

Administrator - 2018-04-23 - 0 Comments - in How-To

The inReach SE, inReach Explorer, inReach SE+, and inReach Explorer+ offer the ability to request weather forecasts. Below you will find the details related to each of the forecast types which can be selected when requesting a weather forecast.

NOTE: Messages from your message allotment will be deducted as well as additional charges may apply based on the type of weather forecast requested. Please see our [rate plans](#) section for further details.

Land forecasts come from [Dark Sky](#), a leading provider of weather data around the globe. Marine forecasts are based on OCENS premium marine weather data.

Basic Forecast

Basic forecasts include a **2-day forecast** where the first 12 hours are displayed in **2-hours increments** and the next 36 hours are displayed in **6-hour increments**.

Premium Forecast

Premium forecasts include a **7-day forecast** displayed in **varying increments** (1-2 hour increments for the first day, 3-6 hour increments for the next day and 12-hour increments for the remaining 5 days).

Premium Marine Forecast

In addition to the details of the Premium forecast, the Marine forecast also includes wave height, ocean current, and visibility details.
